

# CMD Type 3

Compact Moisture Detect

## Improve your energy efficiency

### Increase of energy efficiency

by optimizing the machine settings

### Extremely compact and robust construction

enables installation on nearly every position

### Wide-ranging measurement

from 15% to 95% of dry content of the paper

### Increase of production efficiency

by optimizing the pressure and dewatering settings

### Production and quality control

controlled startup after shutdown of the paper machine

### Measurement of paper

starting at the grammage of 60 g/m<sup>2</sup> and temperature of environment up to 90° C

## Innovations of CMD TYPE 3

- improved PC-software for intuitive user guidance and configuration
- reliable results within a few seconds for quickly reactions on machine settings
- measurement either of dry content or moisture content
- easy shift from absolute to relative value
- storage up to 15 different paper products
- improved holder
- air cleaner and cleaning kit
- enhanced visualization, analysis and storage of the results
- even in Microsoft Excel
- display and analyses up to four sensors
- simply calibration for measurement of absolute values
- active compensation of extraneous lights
- compact and robust construction - simple maintenance

optimization of vacuum settings

optimization of press pressure

control of machine settings
